

NAVALAI GROUP

NAVALAI MANGO

Where Values Took Root.

Before Navalai became a multi-domain enterprise, we began as farmers.

When our founder, Late Shri Vinayak Rao Sawant, sowed the first seeds in Ratnagiri, he planted more than mango trees; he planted a culture of trust, honesty, and service. With Mrs Vijaya Sawant by his side, nurturing every step, a small orchard blossomed into the values that now guide the Navalai Group.

- Ethical and sustainable farming
- Controlled ripening and hand selection
- Export-grade quality packaging

One Legacy. Many Strengths.

Navalai Group, established in 1975, has evolved into a diversified multi-domain enterprise with a strong and dependable operational presence across Agriculture, Construction aggregates, Ready mix concrete, and Renewable energy. Over the last five decades, the group has grown from its agricultural beginnings into a robust ecosystem of high-capacity manufacturing and infrastructure support services. Our growth has been driven by technical expertise, disciplined operations, and long standing relationships with stakeholders.

VISION

To grow into a multi-domain organisation known for building future-forward businesses that create lasting value for people, industries, and the planet.

MISSION

As a group, our mission is to harness our collective strengths to build ventures that drive lasting transformation across the industries we serve.

VALUES

Trust | Precision | Customer First | Innovation | Responsible Growth | Entrepreneurial Spirit | Community Impact

NAVALAI RMC

Ready Mix Concrete

A flagship business delivering engineered, high-performance concrete for infrastructure and real estate.

- Automated batching with real-time proportioning
- Twin-shaft mixers for uniformity
- Moisture-adjusted, consistent output

Plant Capacities

- Ratnagiri Plant — MIC Plant – 60 m³/hr Capacity
- Jaigad Plant — MIC Plant – 60 m³/hr Capacity

ISO 9001:2015 Certified

Why Navalai RMC

- In-house aggregate sourcing ensures batch-to-batch consistency
- GPS-enabled delivery fleet
- Structured dispatch planning
- 24×7 quality testing & mix optimisation
- On-site technical support

Available Grades – Up to M50.

Sectors Served:

Roads · Bridges · Ports · Industrial Parks · Housing · Public Infrastructure

CONTACT

NAVALAI RMC – READY MIX CONCRETE DIVISION

Corporate Office: C-212 213, MIDC, Mirjole, Ratnagiri, Maharashtra, India – 415639.

NAVALAI GROUP – INNOVATIVE CONSTRUCTION MATERIAL FOR MODERN INFRASTRUCTURE

High-Capacity Crushing & Material Supply

450 TPH multi-stage mechanised crushing for large-scale infrastructure.

Our Technology Line

- Swedish VSI for premium shaping & M-Sand
- Australian screening for precise gradation
- German automation for consistency
- Conveyor-based, contamination-free handling
- Dust-controlled operations

Aggregates

- VSI Aggregates – 10mm, 20mm
- 40mm Aggregate
- GSB – Granular Sub-Base
- Grit Powder
- Boulder Supply

Manufactured Sands

- M-Sand / Crushed Sand (Sand-1)
- Plaster Sand
- Cone Sand

Other Materials

- Red Clay Bricks

Why Navalai RMC

- 24×7 production and dispatch capability
- Bulk stockyards
- Dedicated quarry fleet (10+ quarry & earthmoving machines)
- Consistent volumes for long-term contracts

NAVALAI GREEN

High-Yield Renewable Projects

India's first commercial-scale deployment of Dual Axis Tracker Systems, delivering 45–50% higher output than conventional solar plants.

Core Strengths

- Higher generation per acre
- Better land-use efficiency
- Stronger long-term returns
- Engineering-backed execution

Key Projects

- MSRDC Samruddhi Highway Solar Project – 37 MW
- Nanded Solar Project – 100 MW
- Wind Energy Project – 100 MW (Upcoming)

ENGINEERED SAND SOLUTIONS FOR MODERN CONSTRUCTION

Plaster Sand

Navalai Buildmat's Plaster Sand is engineered using European-grade equipment and controlled washing & grading systems to deliver unmatched uniformity, purity, and performance.

- Precision-graded, washed, and uniform
- Eliminates impurities that cause cracks, undulations, and rework
- A sustainable, eco-friendly alternative to river sand
- Available in 40 kg export-grade bags or bulk supply
- Supported by 24×7 logistics for uninterrupted project flow

Ideal For

- Plastering · Tiling · Block Work · Finished Surface

Opti Sand

The Smart Tool Every RMC Plant Should Have.

Concrete batching requires balance, but sand received at plants often arrives too fine, too coarse, or missing critical fractions, forcing technologists to either reject the load or increase admixture dosage.

Solves:

SAND TOO FINE ➤ **QUALITY ISSUES** ➤ **MIX REJECTION** ➤ **ADMIXTURE OVERUSE**

Benefits:

- Immediate gradation correction
- Reduces material rejection
- Ensures a stable concrete mix
- Saves time & cost

Available Gradations:

150–300 μm · 300–600 μm · 600 μm –1.18 mm
